

ASSIGNMENT – 3

CLOUD APPLICATION DEVELOPMENT

Date	26 September 2022
Student Name	Sheima Latha. J
Student Roll Number	813819104090
Maximum Marks	2 Marks

1. Create a bucket in IBM object storage.

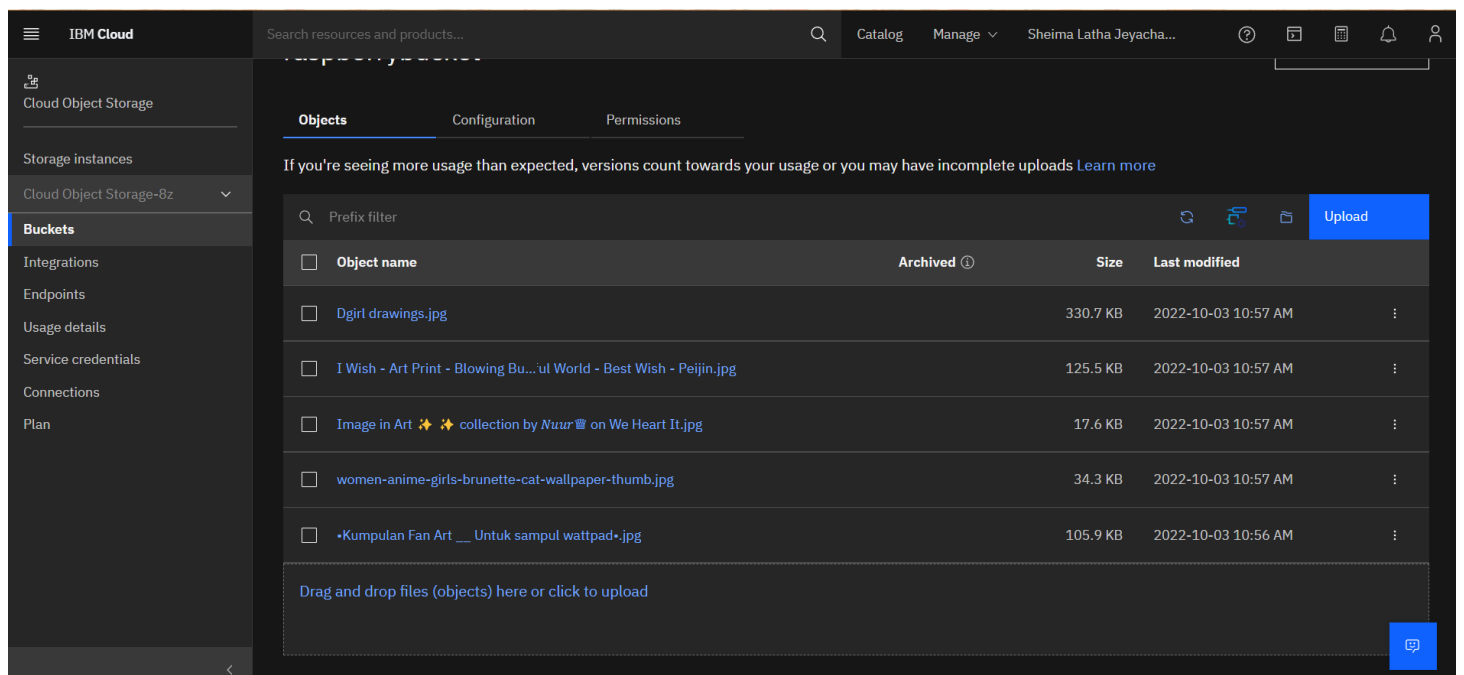

The screenshot shows the IBM Cloud Object Storage interface. On the left, a sidebar lists navigation options: Cloud Object Storage, Storage instances, Cloud Object Storage-8z, Buckets (selected), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main area is titled 'Buckets' and includes a search bar, a 'Create bucket' button, and a table of existing buckets.

Name	Public access	Location	Storage class	Created
raspberrylbucket	No	jp-tok	Smart Tier	2022-10-01 12:44 PM

Thus, a bucket named “raspberrylbucket” has been created.

2. Upload 5 images to IBM Object Storage and make it public. Write an HTML code to display all the 5 images.

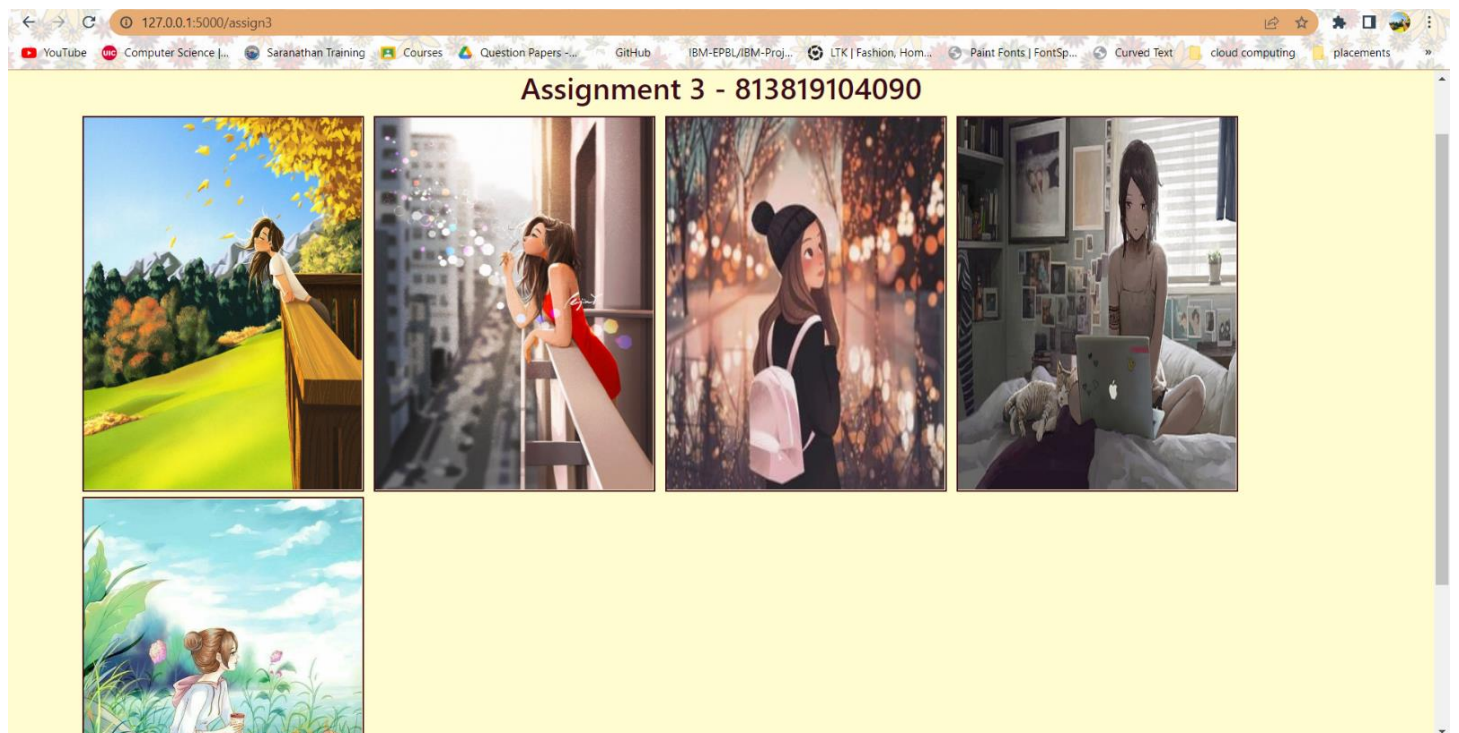

The screenshot shows the IBM Cloud Object Storage interface for the 'Objects' tab. It includes a search bar, an 'Upload' button, and a table of uploaded objects. Below the table is a message about usage and a prompt to drag and drop files.

15   
16   
17 </body>
18 </html>
```

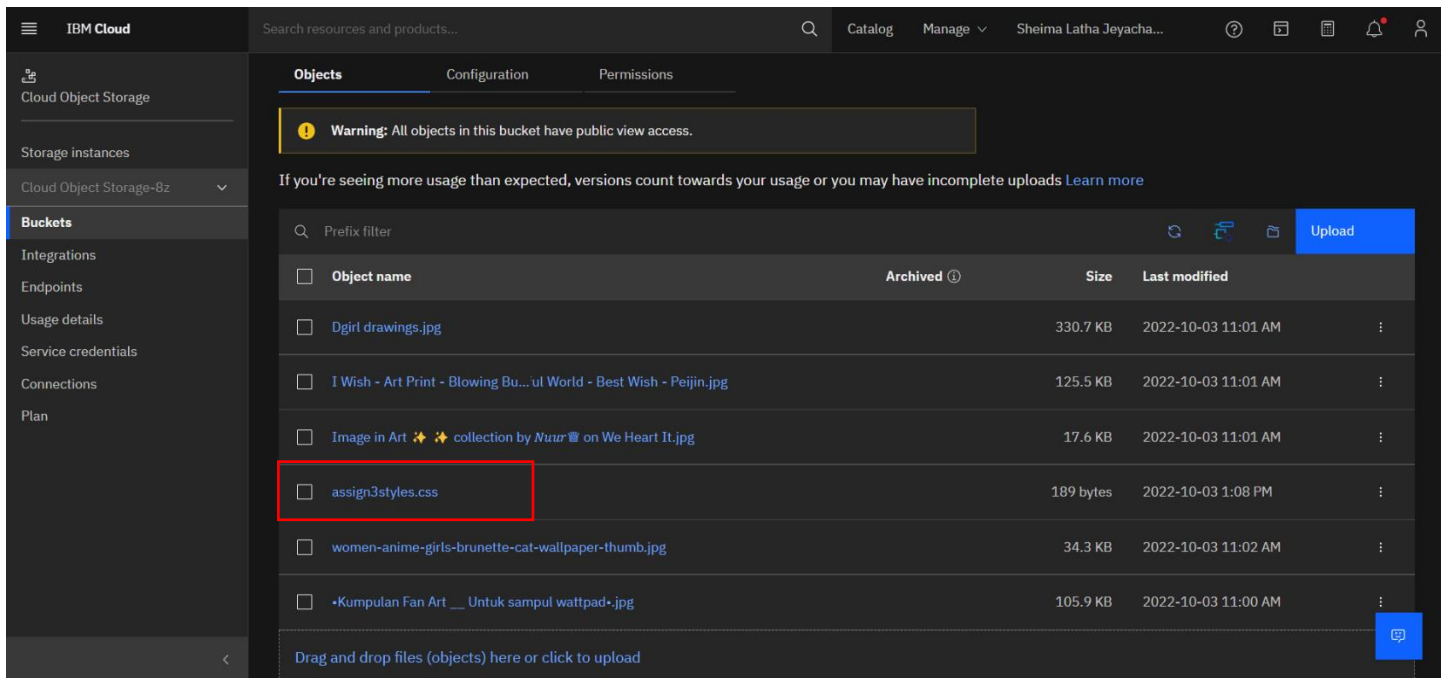

Output:

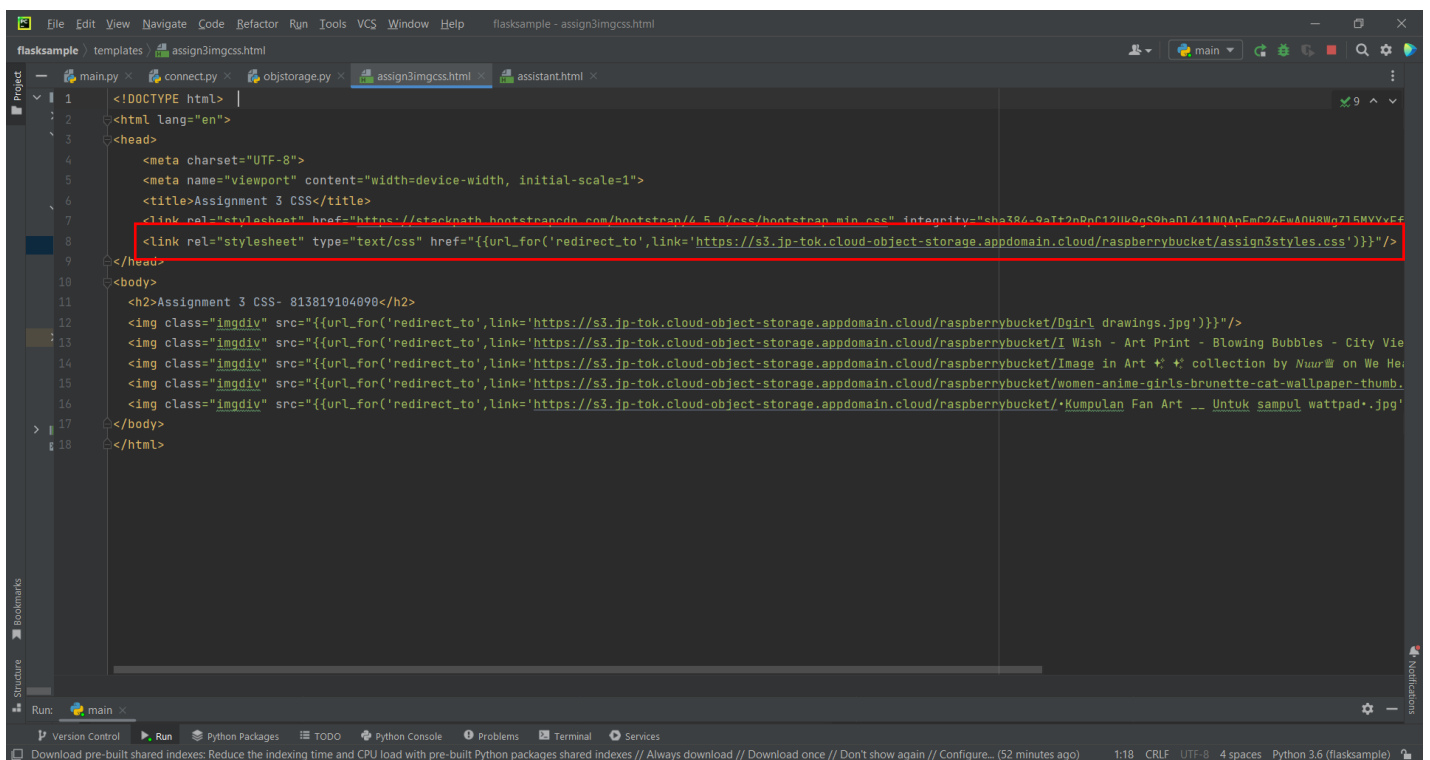

File name: assign3img.html, main.py, objstorage.py

The above mentioned files have been uploaded in GitHub.

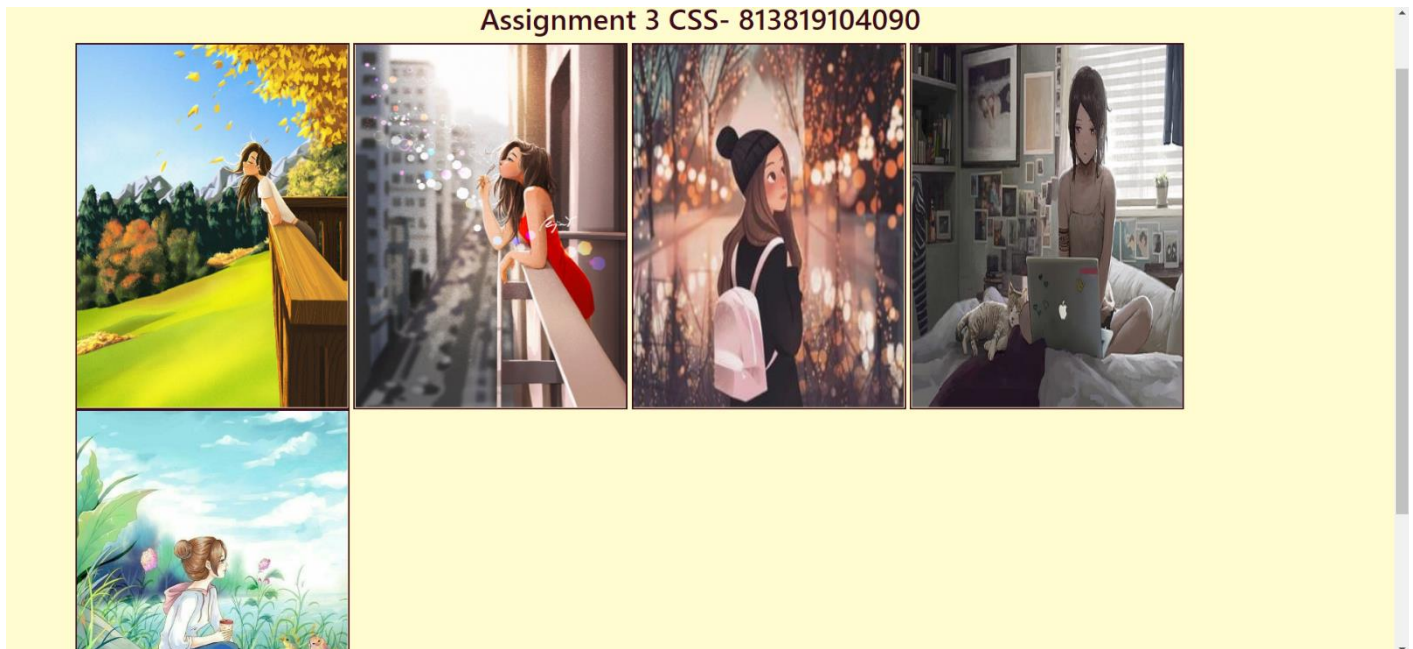

3. Upload a CSS page to the object storage and use the same page in your HTML code.

HTML Code:

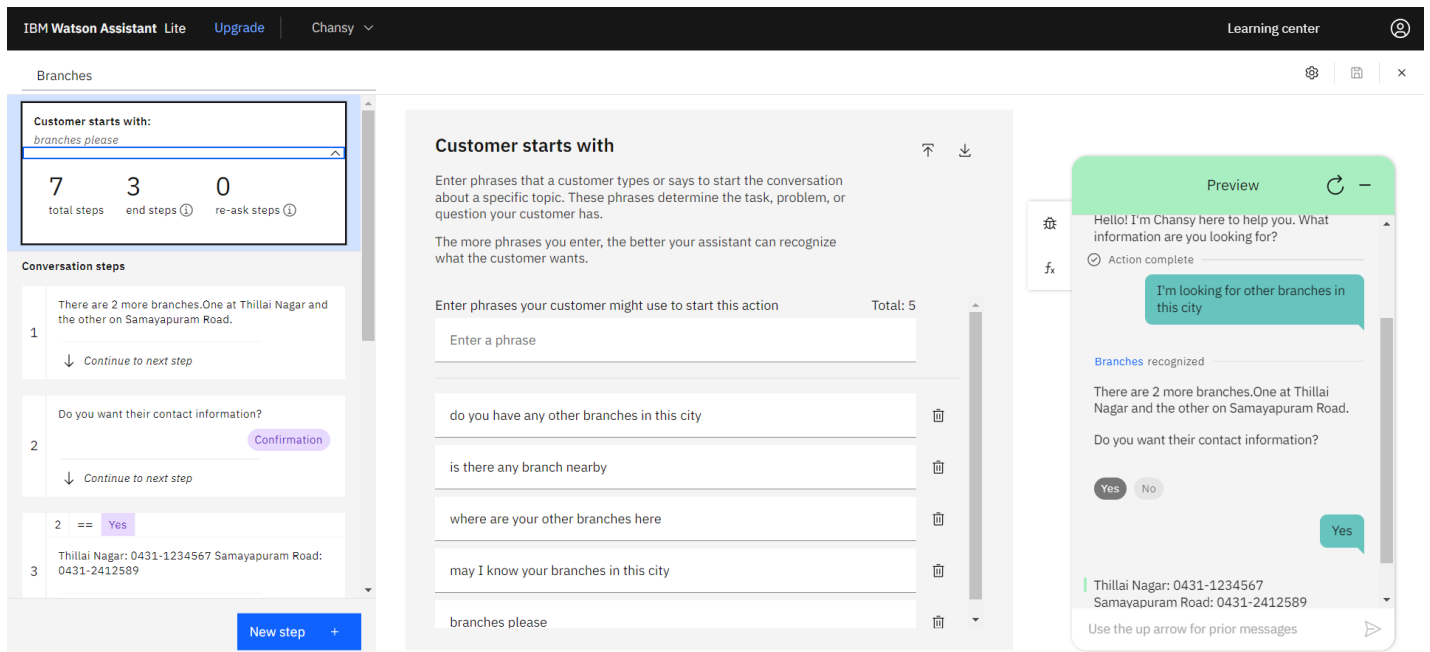

Output:

File name: assign3imgcss.html , assign3styles.css, main.py, objstorage.py

The files have been uploaded in GitHub.

4. Design a chatbot using IBM Watson assistant for hospital. For e.g., user comes with query to know the branches for that hospital in your city. Submit the web URL of that chatbot as an assignment.

The image shows the IBM Watson Assistant interface for a chatbot named 'Chansy'. The top bar includes 'IBM Watson Assistant Lite', 'Upgrade', 'Chansy', and a 'Learning center' link. The main interface is divided into three sections: 1. 'Branches' sidebar: Shows 'Customer starts with: branches please' and a progress bar with 7 total steps, 3 end steps, and 0 re-ask steps. It lists three conversation steps: Step 1 (introductory message), Step 2 (confirmation question), and Step 3 (contact information). 2. 'Customer starts with' section: A list of phrases for the chatbot to recognize, including 'do you have any other branches in this city', 'is there any branch nearby', 'where are your other branches here', 'may I know your branches in this city', and 'branches please'. 3. 'Preview' section: A simulated chat window showing the chatbot's response to the query 'I'm looking for other branches in this city'. The response includes the recognized branches and contact information, with a 'Yes' button for confirmation.

Assignment 3 Chatbot
127.0.0.1:5000/myassistant

Chatbot for Hospital

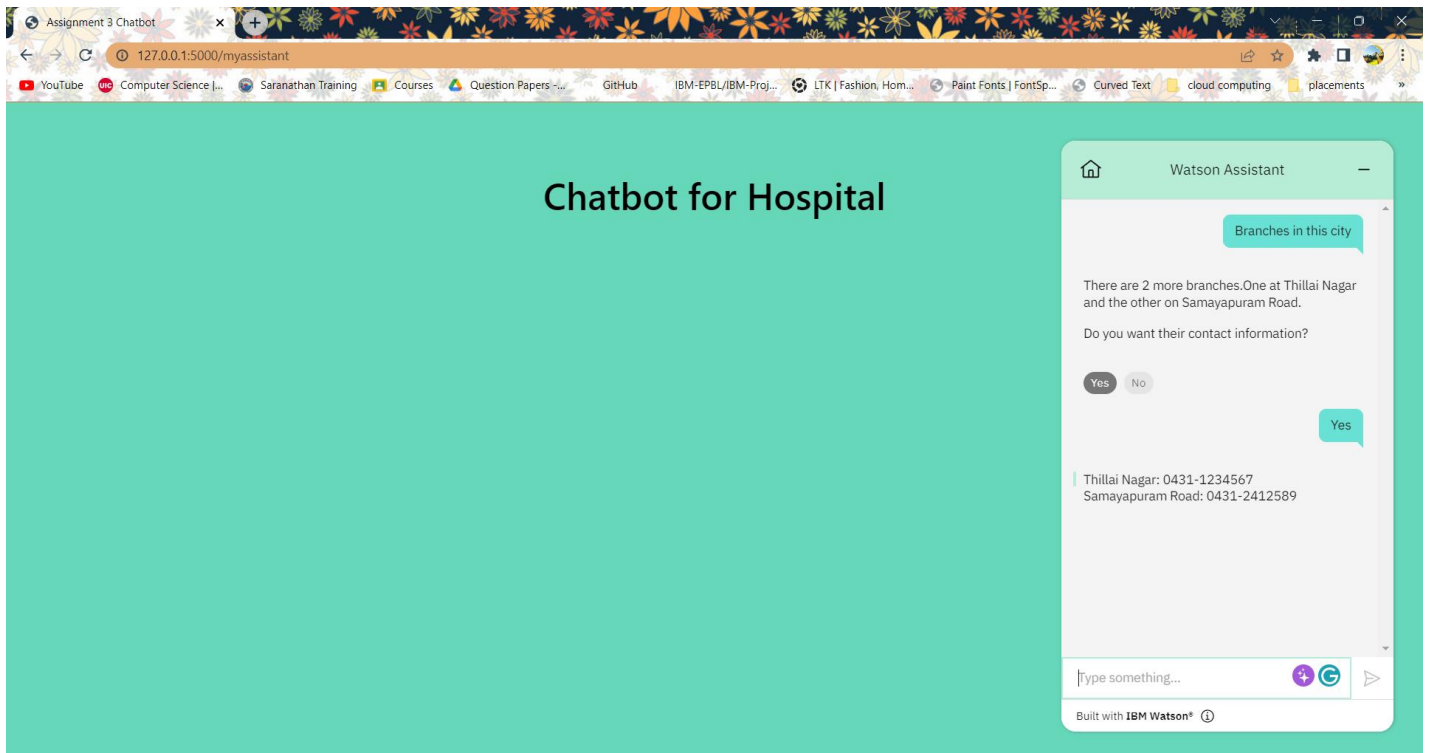

Hi! I'm Chansy. How can I help you today?

Example: Other branches in the city

Example: Details about vaccines

Type something...

Built with IBM Watson®

File name: assistant.html, main.py

The files have been uploaded in GitHub.

Web URL:

```
<script>
  window.watsonAssistantChatOptions = {
    integrationID: "148c8b05-d7de-489c-a970-517c3676838f", // The ID of this
integration.
    region: "au-syd", // The region your integration is hosted in.
    serviceInstanceID: "efccfecfcd-0afd-4fd7-8f9e-8a9e819f7075", // The ID of your
service instance.
    onLoad: function(instance) { instance.render(); }
  };
  setTimeout(function(){
    const t=document.createElement('script');
    t.src="https://web-chat.global.assistant.watson.appdomain.cloud/versions/" +
(window.watsonAssistantChatOptions.clientVersion || 'latest') +
"/WatsonAssistantChatEntry.js";
    document.head.appendChild(t);
  });
</script>
```

main.py:

```
from flask import Flask, render_template, request, redirect, url_for
from connect import *
from objstorage import *
app = Flask(__name__)
```

```
@app.route('/myassistant')
def assistant_page():
    return render_template('assistant.html')

if(__name__=='__main__'):
    app.run()
```

5. Create Watson assistant service with 10 steps and use 3 conditions in it. Load that script in HTML page.

I’m creating a chatbot for hospital.
